

# GIRO SOLE

ART.769T  
ART.769NS  
ART.769N

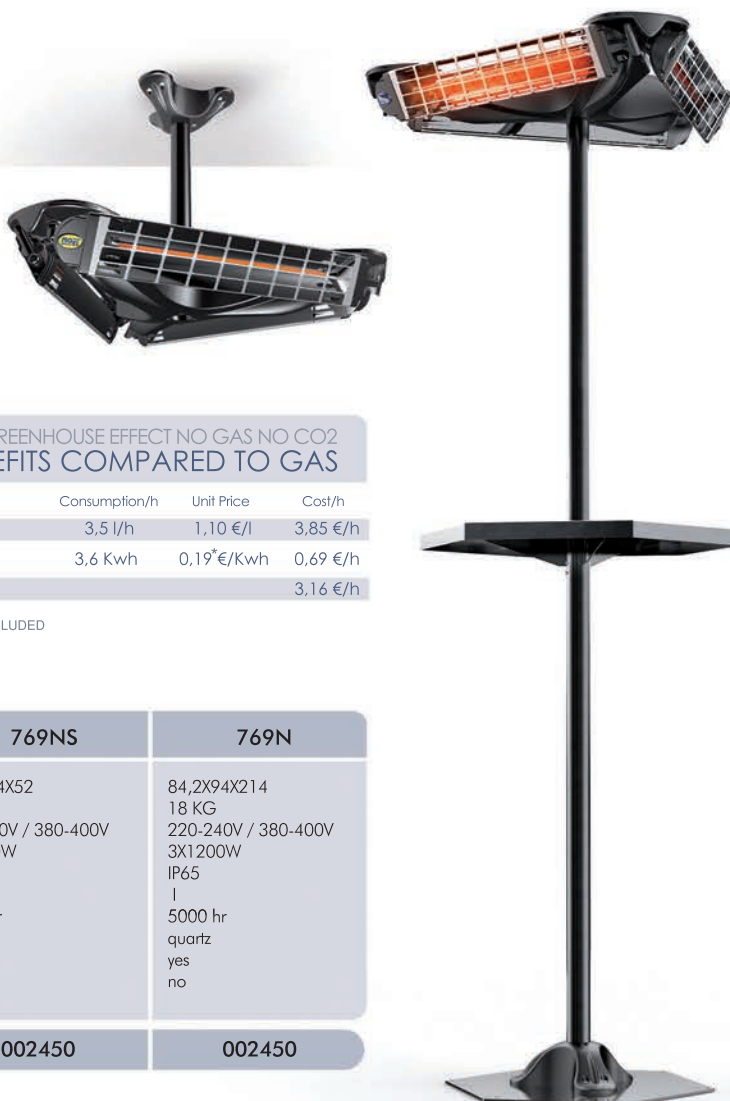

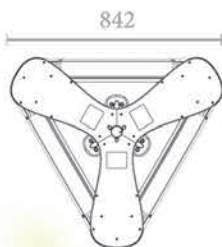

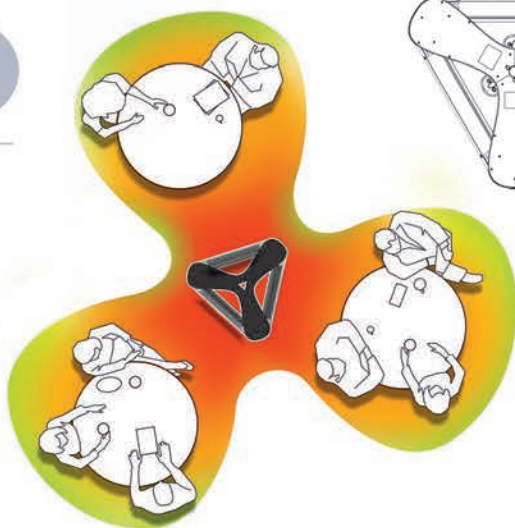

## WARM IS ALL AROUND

Girosole is made of three 1200W Fiore units fixed to an elegant and strong support. It is extremely easy to be installed by using a connection without losing the same IP65 protection.

The impact resistance is guaranteed by a robust grille and by a silicone support system (IK07) which protects the lamp from blows and vibrations. The three lamps can be switched on and off independently. The soft rubber buffers prevent scratches being made to the furniture or to the wall when moving it. The installation is recommended for bars, restaurants and smoking corners.
